World's Production of Beer, 1913.

The world's production of beer in 1913, according to the calculation made by *Gambrinus* (Vienna), increased by 5,552,000 hectolitres over the quantity returned for 1912, which itself exceeded by 4,119,000 hectolitres the production of 1911. The total figures for 1913 are 336,630,000 hectolitres of 22 gallons each, equal to 205,718,000 English barrels. The following are the principal countries dealt with in the calculation, arranged according to the extent of their production of beer:—

United States	... 76,658,000	hectolitres from 1,446	breweries.
German Empire	... 67,468,000	10,967 ..
United Kingdom	... 60,666,000	3,846 ..
Austria-Hungary	... 24,727,000	1,159 ..
Belgium	... 16,350,000	3,214 ..
France	... 16,066,000	3,210 ..
Russia 11,240,000	940 ..
Switzerland	... 3,410,000	97 ..
Sweden	... 2,834,000	190 ..
Denmark	... 2,064,000	336 ..
Holland	... 1,930,000	444 ..
Australia, &c.	... 20,000,000	— ..

The last named includes also North and South America, New Zealand, &c., and the production is a million hectolitres more than in 1912.
